“MEETING YOUR ON-SITE REQUIREMENTS”

CORROSION CONTROL

Engineering and Manpower Services

Engineering Services

BAC Corrosion Control Ltd has the capabilities to design, manufacture, supply, install and commission turnkey systems for both sacrificial and impressed current cathodic protection systems including specialist tapes on structures ranging from pipelines, tank bases and internals to power station cooling water systems, steel in concrete structures and marine installations.

Manpower Services

BAC also offers site services providing site supervision of installations, commissioning and monitoring and maintenance of all cathodic protection systems. Specialist surveys such as soil resistivity measurements, current drain tests, ground bed location, Close Interval Potential Surveys (CIPS), Direct Current Voltage Gradient (DCVG) and AC mitigation surveys can also be completed.
